Fund Management By MM & Attribution By MM

The amounts that are collectively pooled from every single investor are converted into investing in a manner that leads to utmost regulation of our business model. Out of every 100% fund gathered at Mitotic Money the following pattern of investment is elected upon:

Revenue Funds

These are the funds that cover the costs of daily returns provided by Mitotic Money. Revenue funds are allotted in the market with the motive to maintain effortless processing of daily funds from Mitotic Money to its users. Revenue funds form 30% of the total funds nurtured by Mitotic Money. These are diversified into Futures, Options & day trading of Forex & Cryptocurrencies. These funds aid the base of our daily returns. These funds are put to trade on a daily basis to cover the costs of earnings provided to the users.

Safety Margin Funds

The currency markets are free willed. They can neither be controlled nor completely acknowledged because of their vastness & multiple factors acting on them simultaneously. To overcome such hindrances 40% of funds are held in stock to overcome sudden market crises & daily speculations beyond the normal range. This helps us to convert our daily trades to holding positions over a period. With this, we stay on course with our predetermined market strategies while adapting to the trends.

Fortune Funds

Each & every business cannot sustain itself solely on its originated business model. Adaptability to change, improvising technical strategies & adhering to modern commerce is mandatory to overcome economic complications. Thus 20% of funds are allotted to Venture Capitalists in the industry. These mainly include ICO investments, NFTs & pre-acquired tokens for sale. Through these acquisitions, Mitotic Money targets to attain positions that are far more superior & strong.

Contingent Funds

The balance funds are held as operational/working capital for an effortless movement of daily performances. A permanent aggregate amount with escalation provisions for growth is set apart for this purpose. This ensures a flawless process of services in various departments to our clients.

Sometimes our profits are beyond the total pay-outs to the customers. The excess funds are transferred to the 'Security deposit scheme' under one of our various departments. This is used as contingency funds/escrow funds.

Disbursement Of Funds By Mitotic Money

Forex & Crypto

Mitotic Money is concentrated largely on Forex & Crypto activities. Thus, they form 73% of our total income derived. All the major work force is diverted to uphold this section & adapt better strategies to expand & uphold the integrity.

Rate Arbitrage

Different economies, variation in prices, change in demand & supply, market practices are all factors leading to massive rate arbitrages. Being a Global company puts us on the lead to have advantage. A considerable 12% of our income is extracted from this section.

Fortune Investments

A business can survive only by adapting to modern techniques & having modern solutions to same old age problems. People fail to recognize the importance of change. However, at MM we invite change with open arms & thus look to invest in trends & markets that are formed newly & have a larger scope of opportunities. 9% of our sources are from these investments.

Joint Ventures

Collaborations not only help you with man power, resources & funding but they serve a means to implement modern tech, diverge in businesses & also help you with stronger motives. Mitotic Money is a conglomerate business that will always support & grow together. We have 6% of our incomes from Joint Ventures.

Affiliate earnings

All your earnings apart from your investments such as referral, binary & other indirect earnings are termed affiliate income. These incomes are accounted when there is a new source of investment. The ROE is accounted to invested users on a fix basis. Users will definitely gain more monetary benefits only by picking higher amount of investments. However, affiliate earnings are a free source of income. Users with skill and network building can gather leads for Mitotic Money and earn attractive referral and binary earnings.

Referral Earnings

No jargons. You refer, you earn. A part of the investment made by your downline is accounted to you for the efforts. These are in cases where the person joining under you has signed up using your referral ID. Any person joining using any referral ID other than yours will attract no referral income. Either a share in profits or a stake in the company should compensate any new investments coming into any firm. Business is receiving benefits on two ends. Since Mitotic Money is a user-based organization with its own financial resources, we look to raise funds from users at a price that we term referral.

Referral earnings are computed according to your selected subscription. You earn a referral at the rate prescribed in your plan. You can upgrade your referral percentage by shifting to a higher investment. If two subscriptions are active at the same time, the highest referral percentage available among the purchased subscriptions will be picked for computing referral income. Direct efforts for your long hours & dedication. **At MM we offer from 8%-11% referral income.**

No investment is necessary to refer & get credit points in your wallet. An investment is mandatory before withdrawing any fund from your wallet. Instant credit & Round clock withdrawal is possible from Flash Pot.

Binary Earnings

This is where you get your stake at Mitotic Money. The early rangers are always the most benefited. A stake as binary is paid on all indirect referrals & accounts where your efforts to influence users have been minimal. Binary is paid for all pairs that are formed under you as your downlines & their downlines & so on. Basically taking the chain to infinity & multiplying your earnings to another level. Once a slot/position is allotted to a user in the binary tree, it is engraved there forever. Yes, you can access your account at any time.

Since Binary is paid for forming matching pairs with equal amounts one pair is necessary to start your binary earnings & withdraw them. To be eligible to withdraw your binary earnings all you have to do is refer to or create two accounts (One on either leg of your account) that are activated & invested. This will empower you to withdraw all the binary earnings from your downlines & theirs.

A Flat **9% Binary income is awarded to all**. Since it is a matter of stake, we wanted everyone to have a fair chance. No investment is necessary to refer & get credit points in your wallet. An investment is mandatory before withdrawing any fund from your wallet.

Instant credit & Round clock withdrawal is possible from Flash Pot.

Binary Capping Per Day

Describing it aptly, it's the **maximum binary earnings that can be made by a user on a single day**. Depending upon the subscription opted, binary capping is pre-defined for all the plans. Any binary earned over the capping limit in a day will be expelled from the calculation. Binary capping applies day-wise. At the end of the day, your capping limit is refreshed & is available for the following day.
